## Slideway Oil

ISO 68

---

GS Waylube 68 is of a premium quality based on highly refined, high viscosity index mineral oil to provide effective lubrication of machine slide-ways.

It contains tackiness and especially selective additives assuring efficient lubrication and resist stick-slip.

GS Waylube 68 has a unique combination of exceptional frictional characteristics with high extreme pressure performance capability.

### APPLICATIONS

- All machine tool parts, including bearings and gearboxes
- Machine tools slideways

### PERFORMANCE STANDARDS

- General Motors LS-2 Way Oil Performance Level (LW-06-1-04)
- Cincinnati Machine Performance Level (P-47)

### BENEFITS

- Ash-less, light color technology
- Exceptional frictional characteristics as measured by stick-slip
- Strong demulsifying ability and water separation profile
- Capable of high extreme pressure performance

### KEY PROPERTIES

ISO Grade	Appearance	Viscosity (mm <sup>2</sup> /s)		Viscosity Index	Pour Point (°C)	Flash Point (°C)	Rust Test D665 (A&B), 24hrs
		@40°C	@100°C				
68	Clear, Bright	69.19	9.30	112	-27	234	Pass

This bulletin was prepared in good faith from the best information available at the time of issue. While the values and characteristics are considered representative, some variation, not affecting performance, can be expected.

It is the responsibility of the user to ensure that the products are used in the applications for which they are intended.

Produced by GS Caltex Corporation.
