

## KIXX UNITRANS

UNIVERSAL TRACTOR TRANSMISSION OIL

### DESCRIPTION

UniTrans is a high performance, all weather lubricant used in transmission, hydraulic systems, final drives and wet brakes of agricultural tractors and farm equipment. It is formulated with premium quality group II plus base oil and robust additive package to provide excellent anti-wear protection, moderate EP properties, oxidation and rust and corrosion protection.

### APPLICATIONS

- Recommended for use in the hydraulic systems, final drives, transmission, wet brake system of most of the farm tractors. Tractors fitted with Power Take Off with wet clutches
- Hydrostatic drives
- All tractors, earth moving and other off-road equipment where the use of a UTTO type product is specified by the manufacturer
- Automotive manual transmissions and gearboxes.

### PERFORMANCE STANDARDS

API GL-4

### BENEFITS

- Excellent protection against rust and corrosion
- Advance anti-wear protects the engine components against wear
- Highly shear stable hence retention of fluid viscosity
- Good filterability in hydraulic system
- Compatible with wide range of elastomers preventing the leaks
- Can be used in all seasons

### KEY PROPERTIES

Viscosity @ 40°C (mm <sup>2</sup> /s)	54.67
Viscosity @100°C (mm <sup>2</sup> /s)	9.74
Viscosity Index	166
Pour Point (°C)	-39
Flash Point (°C)	220
Brookfield Viscosity @ -35 °C	58000

This bulletin was prepared in good faith from the best information available at the time of issue. While the values and characteristics are considered representative, some variation, not affecting performance, can be expected. It is the responsibility of the user to ensure that the products are used in the applications for which they are intended. Produced by GS Caltex Corporation
